

Krishna Madhav Jha

Patna, Bihar, India | +91-9508634210 | krishnamadhav121@gmail.com | LinkedIn | GitHub

Professional Summary

Computer science student specializing in full-stack development (MERN). Experienced in building secure web platforms, AI-powered applications, and scalable backend systems using modern development technologies.

Education

VIT Bhopal University <i>B.Tech in Computer Science and Engineering</i>	Sep 2023 – May 2027 CGPA: 8.99/10
N.S. DAV Public School, Sitamarhi <i>Senior Secondary (PCM)</i>	Apr 2022 – Mar 2023 Grade: 9.2/10
N.S. DAV Public School, Sitamarhi <i>Secondary (Computer Science)</i>	Apr 2020 – Mar 2021 Grade: 9.18/10

Technical Skills

- **Languages:** Java
- **Web Development:** React.js, Node.js, Express.js, MongoDB, RESTful APIs, HTML/CSS
- **Cloud & DevOps:** Docker, Git, MySQL, Firebase
- **Testing & API Design:** Postman, RESTful API Design
- **Core Competencies:** Data Structures & Algorithms, OOP

Projects

Interview AI – AI-Powered Mock Interview Platform	May 2026 – Jun 2026
<i>Full-Stack Developer</i>	<i>React.js, Node.js, Express.js, MongoDB, REST APIs, LLM APIs, Vercel</i>

- Implemented JWT-based authentication with MongoDB for secure user login, registration, and session management.
- Built resume and job-description analysis using Gemini API, generating technical, behavioral, and role-specific interview questions.
- Developed an experience rewriting feature using Gemini API to transform user experiences into STAR, PAR, and other structured formats.
- Created REST APIs with Express.js and integrated PDF resume processing to extract candidate information for personalized analysis.

Teacher's Friend	Jan 2026 – Present
<i>Full-Stack Developer</i>	<i>React.js, Node.js, Express.js, MongoDB, RabbitMQ, Gemini API, JWT, REST APIs</i>

- Developed a full-stack teacher management platform enabling teachers to create classes, manage students, upload Excel/PDF files, track academic records, and generate detailed performance reports through a centralized dashboard.
- Built an AI-powered report generation pipeline using RabbitMQ and the Gemini API, processing report requests asynchronously to improve scalability under concurrent workloads.
- Implemented a context-based document assistant allowing teachers to upload PDF documents and receive context-aware answers from the Gemini API.
- Integrated Excel/PDF parsing for automated student data extraction, reducing manual effort while improving accuracy in marks processing.
- Designed secure RESTful APIs with JWT authentication and role-based access control (RBAC), ensuring protected access to teacher and administrator functionalities.

Event-Driven Order Processing & Inventory Reservation System	Sep 2026
<i>Backend Developer</i>	<i>Java, Spring Boot, Apache Kafka, PostgreSQL, Docker, JPA</i>

- Developed two Spring Boot microservices for order processing and inventory management, using separate PostgreSQL databases and asynchronous Kafka communication.
- Implemented atomic stock reservation with conditional database updates to prevent overselling during concurrent orders.
- Designed idempotent Kafka consumers and reservation tracking to prevent duplicate stock deductions when messages are redelivered.
- Implemented a compensation workflow that automatically releases reserved inventory when payment processing fails.
- Containerized PostgreSQL and Kafka infrastructure using Docker Compose.

Achievements & Certifications

- **Oracle Certified Java Programmer** – Oracle, ID: 102037503JAVA80JA
- **MERN Full Stack Developer** – ETHNUS, ID: SKYMNJ9Q
